Math to Stats

Josh Davis

Josh Davis is a research statistician for State Farm's P&C underwriting department. He will be telling us about his journey with math and statistics as well as provide us math lovers with tips on how to get through it all and possibly land a career.

Josh graduated from WIU with his bachelor's degree in math back in 2013 with honors, including the department scholar award. He finished his masters degree in math at Illinois State University in 2015.

Pizza and drinks will be served. If you have any questions or ideas regarding what we could do during a future meeting, email Jake Winters at ja-winters@wiu.edu.
