PMs and MPs in Mathematics Education

Dr. Bob Mann

The exploration of Pizza Mysteries (PMs) will elicit the use of the Mathematical Practices (MPs). The Mathematical Practices are an important part of the Common Core State Standards in Mathematics (CCSSM) and represent a significant shift in the methods for teaching and learning mathematics in grades K-12. The goal of the standards is to help all students become college or career ready and the MPs focus on skills and strategies that should help students within and beyond the mathematics classroom. So come enjoy the pizza, explore the pizza mysteries, and experience the mathematical practices.

Pizza and drinks will be served. If you have any questions or ideas of what we could do in a future meeting, email Jake Winters at ja-winters@wiu.edu.
